Miltech Fighters: M2K-C

Introduction

Thank you very much for purchasing Miltech Simulations M2K-C.

At Miltech Simulations, we continue innovating. This time, we present to you the **First Fourth-Gen aircraft with a functional Weapons System in MSFS.**

The M2K-C is a multirole, single-engine, delta-wing, fourth-generation jet fighter inspired by French aircraft design.

This aircraft boasts impressive maneuverability, speed, and versatility, making it suitable for a wide range of missions, including air superiority, ground attack, and reconnaissance. Its design is sleek and agile, reflecting the French emphasis on aerodynamic efficiency and performance.

M2K-C is powered by a single engine providing 54.0 kN Thrust, with a single-stage Afterburner boosting the aircraft to 84 kN (19,000 Lbf). Maximum speed is Mach 2.2 at 60,000 ft, and a range of roughly 850 Nautical Miles, which can be extended with external tanks.

The M2K-C can conduct multirole air combat operations, ranging from Aerial Bombing, Air-to-Air combat, Air Support, among others. It is quite prevalent in Dog Fighting, as the Delta Wing provides a very high sustained turn rate, and the ability to perform instantaneous turns.

This product is once again the result from a successful partnership with Maryadi, a talented developer who has worked in very well-known projects since the FSX Days. As result of such collaboration, we now present our rendition of the M2K-C for Microsoft Flight Simulator 2020 and 2024.

We hope you enjoy the product,

Miltech Simulations.
