The M2K-C is a multirole, single-engine, delta-wing, fourth-generation jet fighter inspired by French aircraft design.

This aircraft boasts impressive maneuverability, speed, and versatility, making it suitable for a wide range of missions, including air superiority, ground attack, and reconnaissance. Its design is sleek and agile, reflecting the French emphasis on aerodynamic efficiency and performance.

M2K-C is powered by a single engine providing 54.0 kN Thrust, with a single-stage Afterburner boosting the aircraft to 84 kN (19,000 Lbf). Maximum speed is Mach 2.2 at 60,000 ft, and a range of roughly 850 Nautical Miles, which can be extended with external tanks.

Though primarily an interception and air-to-air combat, the M2K-C can conduct multirole operations, ranging from Aerial Bombing, Air-to-Air combat, Air Support, among others.
