Miltech Mission Hub

Sling Load End

Specifies an area where the sling load has to be delivered. You need to connect this to the Sling Load Start.

Attributes

Attribute	Description
Drop Area Radius	Radius (meters) of the drop area for the sling load. If dropped outside of this area, the **Wrong Delivery** event will fire.
Show Direction	In the HUD, show the the exact direction to the sling load end.

Actions

Action	Description
Picked Up	Make sure the corresponding Sling Load Start is connected here.

Events

Event	Description
Dropped Off	Fires when the sling load is dropped **inside** the *Drop Area Radius*.
Wrong Delivery	Fires when the sling load is dropped **outside** the *Drop Area Radius*.
