Miltech Simulations CH47D

Cargo Load Operations - Internal

Loading Procedure

The Electronic Flight Bag (EFB) is used to load and unload internal cargo to the aircraft.

1. Turn on the EFB screen by pressing the ▣ **HOME** Button
2. Navigate to the **LOAD** page
3. Select "Internal Loads"

Loads Page

4. Load/Unload cargo by pressing on the available options.
5. A single cargo load type (External or Internal) can be active at any given moment.
6. Selecting a different load type will unload the active option, and load the selected option.

7. Loading any external cargo load will automatically unload any internal cargo.

Included Internal Loads

- **Troops**
- **Medvac**
- **Special Ops Rhib**
- **Pallets**
- **Humvee**
