Miltech Simulations CH47D

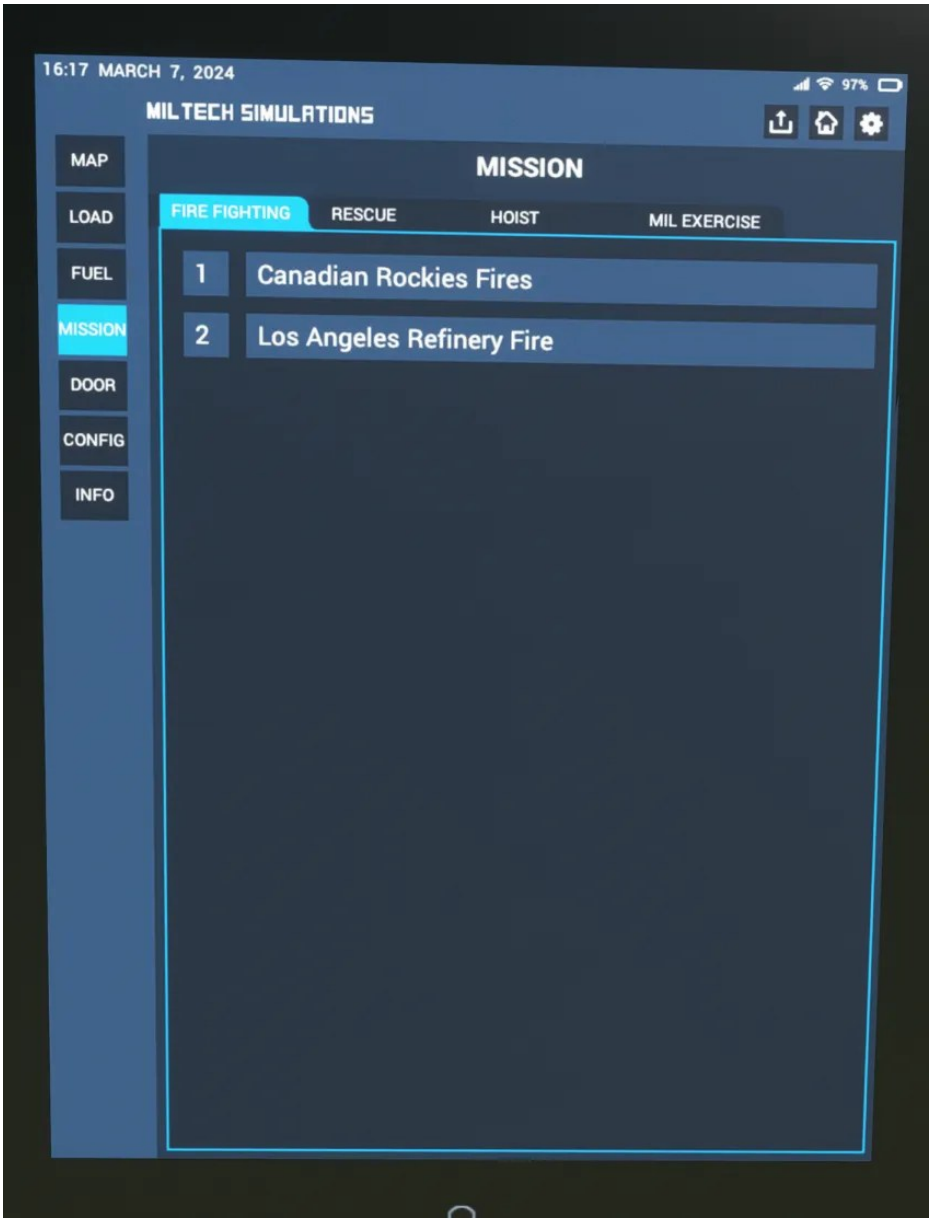

Mission Procedures

Caution

- **Crash detection must be OFF** for Missions to load correctly, as Crashes may interfere with our loading scripts.
- **Beware of sling load limitations** - must fly at maximum 120kts and avoid violent maneuvers when carrying external loads.

Accessing Missions

1. Launch a flight with the CH47D at any airport in the world.
2. Turn on the EFB screen by pressing the ▣ **HOME** Button
3. Navigate to the **MISSION** page

Mission Page

4. Select any mission from the list.
5. Wait a few minutes for the mission to load completely. The aircraft will be automatically relocated to the start location and all required mission objects will be loaded.
